- LAN crimping, testing & troubleshooting

PROFESSIONAL STRENGTHS

- Fast, transparent updates
- Client-focused revisions
- Technical problem-solving
- File and task organization
- Research and data entry
- Dual-internet remote reliability

PROFESSIONAL SUMMARY

Information Technology student and independent freelancer with hands-on experience in website development, IT support, computer repair, Discord bot development, SQL systems, creative assets, and online client service. Supported 248+ clients and community customers since 2022 across websites, gaming services, bots, design, and PC support. Known for transparent communication, practical troubleshooting, careful revisions, and dependable delivery. Seeking flexible part-time, freelance, remote, or suitable onsite opportunities.

FREELANCE & TECHNICAL EXPERIENCE

Freelance Web Developer | 2021 - Present

Independent - school, personal, community, and client projects

- Plan, design, build, test, deploy, optimize, and maintain responsive websites for business, community, school, and personal use.
- Create contact forms, login systems, dashboards, database-connected features, booking interfaces, galleries, admin panels, and user-management functions.
- Handle domain setup, hosting, speed optimization, troubleshooting, revisions, and clear progress reporting.

Computer Technician & IT Support | 2019 - Present

Independent technical service

- Assemble and troubleshoot PCs, replace components, install Windows, drivers, and software, and resolve slow or unstable performance.
- Clean components and perform CPU/GPU thermal paste and thermal pad replacement for preventive maintenance.
- Configure routers, Wi-Fi, IP/DNS, port forwarding, LAN devices, and cable testing; completed paid repair and cleaning work.

Discord Bot Developer | 2025 - Present

Discord and gaming communities

- Build and repair custom bots with slash commands, whitelist, ticket, role, logging, security, timesheet, dashboard, database, and hosting features.
- Update dependencies, diagnose errors, optimize CPU/RAM usage, and maintain organized multi-bot systems.

DIGITAL ASSISTANCE

- Email management
- Data entry & spreadsheet updates
- Online research
- File organization
- Document formatting
- Customer chat support
- Reports & client updates
- Website content updates
- Basic task/team coordination

SOFTWARE & TOOLS
